Lorand Veres
.NET Fullstack developer

Having me on board, you will get a focused, passionate and result-oriented implementor, driven by endless curiosity for creating and applying pragmatic solutions. I am passionate about understanding processes and people and I solve problems by having a holistic and comprehensive approach. Due to my multidisciplinary background, I am confident to perform across various tasks and fields.

As an employee, I thrive in a dynamic environment where I am surrounded by dedicated and fun professionals. With my communication and interpersonal skills, I connect with people and keep the morale high in order to reach our goals. I am positive that my competences coupled with my motivation would make me a successful developer.

Frontend technologies
HTML5, CSS, JS, React, Redux, Material UI

Environment
Windows, Azure Devops, Agile, Visual Studio, VSCode

Language

English
German
Hungarian

Experience

November 2021 - February 2023
AGCO Hungary Kft. I Budapest, Hungary
Full-Stack MES Developer (full-time)
Focus on:
- full implementation of features (backend and frontend),
- handling multiple projects simultaneously in different languages,
- troubleshooting and resolving complex technical issues,
- developing and maintaining RESTful APIs and integrating third-party APIs.

Results: Ability to work both front and backend independently and cooperate in teams. I was responsible for taking over the maintenance of an entire project, including the development of minor features from a senior developer.

May 2021 - November 2021
AGCO Hungary Kft. I Budapest, Hungary
Junior Full-Stack MES Developer (full-time)
Focus on:
- familiarizing myself with the technologies used in projects,
- implementing various tasks to gain a solid foundation of the code-base, programming languages and technologies,
- completing assigned tickets to build up my skills and confidence,
- effective cooperation in team settings.

Results: As I gained more experience, I became proficient in implementing new features and in resolving various bug tickets.
